

GOLD MICRO-CLICKER

AAE's *GOLD MICRO-CLICKER* is the only micro adjustable clicker made! The *Micro-Clicker* was designed to give all recurve archers a precision draw length adjustment. The *Gold Micro-Clicker* allows you to make precise adjustments while shooting and is fully adjustable to fit different bows and arrow lengths. The Gold Clicker mounts under the sight and is slotted for easy adjustment. The Clicker blade is made of stainless steel.

INSTALLATION:

To install the *Gold Micro-Clicker*, first install the *clicker plate* on the bow, under your sight block. There are two slots for extra adjustment. The *clicker plate* should be installed with the arm forward. Next, install the *clicker blade* with the 6-32 x 5/16 *Button Head Cap Screw*. The *clicker blade* has three holes and two in the *Micro Adjust Block* to give you five different blade adjustments. The *Micro Adjustment Block* allows you to tilt the *clicker blade* at an angle or keep it straight up and down. To make your micro adjustments, first loosen the *Micro Lock Screw* (8-32 x 1/2 *Socket Head Cap Screw*) and turn the *Micro Adjustment knob*. Each click is .005". When you get the clicker moved to the desired adjustment, tighten down the *Micro Lock Screw*.
